Colour is a language of the Soul

Colour bypasses the conscious mind and interacts with our Being. We are vibrational Beings, colour is vibration and Colour Mirrors is a vibrational tool.

Developed by Melissie Jolly, Colour Mirrors is precisely that: colour mirrors that which is within. This is a mirror to our soul and what our soul seeks to bring forth to our conscious mind in order to empower us to reach our highest potential. Whatever we seek guidance on, our colour choices safely provide the solution, support, healing and empowerment.

Our Soul communicates through colour. Let the conversations begin....
